

Mini USB Reader / Programmer

USB desktop reader/programmer for enrollment, configuration, and card programming workflows.

Key Features

- USB 2.0
- Plug & Play
- 125kHz / 13.56MHz
- Desktop

Technical Specifications

Specification	Value
Interface	USB 2.0, compliant with USB 1.1
Transmission Speed	12 Mbps USB full speed
Read Range	1.5 - 6 cm
Frequency	125kHz / 13.56MHz
Voltage	Bus powered
Operating Current	100 mA peak
Temperature	0 C to 55 C
Dimensions	85.8 x 54 x 12 mm
LED	Blue, green and red

Typical Applications

- Credential enrollment
- Card programming
- Service bench configuration

Notes: Final technology, output format, mounting, and compatibility should be confirmed against the access control platform, elevator control system, project drawings, and approved submittals.
